

SF2 Subscription Pricing

An SF2 subscription is required to achieve +/- 4" accuracy on an SF2 Ready receiver. There are several options a customer can choose when purchasing a subscription.

Subscription	MSRP (US\$)
3 months	\$400
6 months	\$600
12 months	\$800
24 months	\$1,400
36 months	\$2,000

Subscriptions are purchased through the StellarSupport.com. Customer will need to provide the receiver serial number at the time of subscription purchase.

The subscription starts at the time of purchase and will run until completely used. If a customer has time left from a previous subscription, the newly purchased subscription is added onto the remaining subscription. For example, a customer who purchased 3 month subscription on January 1 and then purchased a 12 month subscription on February 28, would have 13 months of available subscription.
