

# Generating JDRP Crop Insurance Reports

**1.** Select report icon

**2.** Under preferences select client farm and field

**3.** Select year and/or date range

**4.** Select desired JDRP report  
**A.** Acreage report for planting information  
**B.** Production report for harvest information

The main screenshot shows the 'Available Reports' sidebar with 'JDRP' selected. The 'Preferences' window shows a tree view of client farms and fields, with 'Field 21050' selected. The 'Date Range' section shows 'Season/Year' set to 2003 and 'Date Range' from 3/25/2003 to 3/25/2003.

The 'Acreage Report' screenshot shows a table with columns: Field #, Crop, Type, Practice, and Planted Acres. The data includes fields 1, 2, 3, 4, 5, and 7, all planted with Corn in 2003.

The 'Production Report' screenshot shows a table with columns: Field #, Crop, Type, Practice, Acres, Moisture, Wet Weight, Dry Weight, Total Production, and Yield/acre. The data includes fields 1, 2, 3, 4, 5, and 7, with crops of Corn and Soybeans.

# John Deere Risk Protection – Crop Insurance for Apex

**1** Select "Setup" icon

**2** Select "Field" under Enterprise group

**3** Ensure the field(s) is setup in the "Existing Fields" box. Select "Modify" if crop insurance information has not yet been entered. If field does not exist select the "New" button to create a new field

**4** FSA field information (Optional). Field ID will populate the field # on the acreage and production report
