

GS2 1800 Software

Release Notes

Announcement

For owners of the limited build GS2 1800 Display, new software is available. This update enables GreenStar™ applications such as AutoTrac™ and Swath Control Pro™ on the GS2 1800 Display. Previously, the 1800 would only function as an ISOBUS Virtual Terminal. This update includes the following functionality:

- Manual guidance
- Compatibility with the GreenStar Lightbar
- Coverage mapping
- The ability to unlock software activations
- Demo activations
- Boundaries
- AutoTrac (if activated)
- Swath Control Pro (if activated)
- Pivot Pro (if activated)

Release Notice

These are the Release Notes for the March 30, 2009 GreenStar2 1800 Display software version 2.0.554.

Important Notes:

- This update is only necessary for owners of the GS2 1800 Display. No other component software is affected by this update.
- If guidance, mapping or Swath Control Pro are not going to be used on the GS2 1800 display, this update is not necessary.
- The AutoTrac Transition Program has been expanded to include the GS2 1800 Display. This is open for owners of the Original GreenStar Display who would like to exchange their AutoTrac KeyCard for an activation on the GS2 1800.
- At this time, The GS2 1800 is ONLY approved for use on tractors, SeedStar 2 planters and seeding equipment, and the AutoTrac Universal Steering Kit (ATU and ATU 200).
- The GS2 1800 is not compatible with Apex or any other desktop software programs. Boundaries, Clients, Farms, Fields, and Guidance Lines cannot be imported from Apex or another GreenStar Display.
- **If connecting a StarFire iTC receiver, the receiver must have the most recent software update installed (3.40N). Update the StarFire iTC using a GS2 2600, Original GreenStar Display, or the StarFire iTC Desktop Configurator.**
- Displays shipped after March 30th already have this software update installed and GreenStar applications can be accessed through the GreenStar button in the display menu.

- Special instructions for this update as well as software can be found at http://stellarsupport.deere.com/en_US/support/greenStarSystem.html.
